

Production Manager

Job Overview

Ram Industries Inc. is seeking a **Production Manager** with experience leading a quick paced, modern manufacturing facility. This position is located at our head office in Yorkton, Saskatchewan.

Ram Industries Inc. is a manufacturer of custom designed and standard hydraulic and pneumatic welded cylinders. The Production Manager is responsible for leading the production team to coordinate all required inputs that successfully achieves a high mix build-to-order production schedule, at the cost and quality demanded by our Customers.

Education/Experience:

The ideal candidate will have progressed through a manufacturing or processing environment as a Plant Foreman or Supervisor, with exposure and/or education in machine shop practices, factory technologies and engineering coordination. A post-secondary education in engineering, production, business or related discipline is welcome.

Our factory has machining, welding, assembly, test and painting processes; therefore, a good understanding and knowledge of these processes would be a definite asset. Exposure to MRP or ERP systems, as well as lean tools and concepts is beneficial.

Duties:

The Production Manager is responsible for all aspects of manufacturing planning and control to attain targets set by Customer needs and business plan objectives. This includes:

- Production planning, scheduling and monitoring;
- Labour planning and employee management, including department balancing, efficiency assessments, and coordinating needs for growth and skill upgrading;
- Materials and inventory management, including purchasing and cost control, sourcing and supplier relations, and inventory storage and accuracy;
- Oversight of customer relations and sales/engineering coordination related to product designs, deliveries, warranties, shipping, and quality.
- Compliance and continuous improvement of the Company quality assurance system;
- Coordination of factory, equipment and building maintenance; and
- Compliance with health and safety standards;

Skills:

- Strong business sense, positive attitude, and a high energy level driven to lead a production team;
- Effective organization skills with strong planning capabilities;
- Strong hands-on understanding of manufacturing operations, particularly in a metal manufacturing environment (exposure to machining operations is an asset);
- Proven ability to independently supervise, mentor and manage personnel to overcome obstacles and achieve objectives;
- High customer service and continuous improvement ethic;
- Above average computer expertise (and ideally past use of ERP); and
- Excellent English communication and interpersonal skills.

What We Offer:

- Dynamic, challenging work for talented individuals
- Competitive salary
- Comprehensive benefits including paid vacation leave, registered group pension plan and group benefits (including vision, dental, short-term/long disability and life insurance)
- Inclusive work environment
- Opportunities for advancement.

About Us....

RAM has over 45 years serving markets across North American as an ISO 9001 certified Company for cylinder design & manufacturing.
